

## **Thomas Barraclough AI Module Game How To Play:**

Collect 3 keys. Press e on the keys to pick up. After three keys have been gathered go to the npc in the middle of the map and give him the keys. After this defeat the boss then you have beaten the game.

Along the way you can loot chests for gear, each gear comes with an element. Elements work the exact same way as they do in pokemon, fire beats water etc. Press q to view your weapon stats. The higher the number for each genetic the better. The best genetic for each stat is 50. Level up by killing enemies for more damage.

You can ride the dragon by pressing E on it.

The trees and rock around the map are spawned through a procedural generation AI.

Hope this helps!
